

THE ROLE OF HUMAN RESOURCES IN BUSINESS CONTINUITY

Human Resources (HR) professionals have to face many challenges as the profession advances in the 21st Century. The Sept. 11 tragedy, natural disasters and terrorist activities have all shown the important role of Business Continuity Planning. This seminar will show you how HR plays a key role in the planning, response and recovery phases involved in a crisis or disaster incident.

WHO SHOULD ATTEND

Directors, managers and administrators who have strategic roles in creating, planning, and executing Business Continuity policy within their organizations.

WHY YOU SHOULD ATTEND

- ❖ Understand your vital role in responding to catastrophic events or incidents that can have a profound effect on your organizations
- ❖ Learn how to cope with emergencies and emerging threats from an HR perspective
- ❖ Understand the concepts of business continuity and the steps necessary for recovery

**APPLIED SCIENCE FOUNDATION
FOR HOMELAND SECURITY**

Public Safety • Research • Economic Development • Education

The Foundation is a 501(c)(3) not-for-profit organization that focuses on accelerating the transfer of technology into end-user-driven products and systems in support of first responders and other homeland security personnel. We accomplish this by creating a “living lab” environment in our Morrelly Homeland Security Center – which is the first, and only one, of its kind privately owned homeland security C4I facility – that allows for unprecedented collaboration between the public and private sectors. The result: A more efficient way of developing and commercializing products and services that homeland security end-users need and can afford.
